

Installation of Clients

There are different clients for Windows, Linux and MacOS and it exists also Plugins for every browser - you have to install the **Bitwarden Client**:

1. Download and install it:
 - [Windows Executable](#)
 - [others](#)
2. You have to configure under **Logging in on:** as *self-hosted*. Add in the URL `https://vault.vogelwarte.ch`.
3. Login with vogelwarte.ch E-Mailaddress and your masterpassword into your vault!
4. Under settings you can manage some easier login f. e. biometrics

Add other user to shared vaults / collections

[Bitwarden+PW-Management.doc](#) (german created by the Web-Team - Thx)
